

Approximate Red Deer Gestation Table 236 days

European Red Deer are one of the larger Cervid species with a rich reddish brown coat in the summer which turns to a grayish brown in winter. Males range from 230 to 750 lbs and females range from 163 to 225 lbs. Red Deer breed mainly in October and have a gestation of 7 1/2 to 8 1/2 months. Male Red deer (Stags) have a distinctive “roar” during the rut, which is most common during early dawn and late evening. Hinds tend to have singles at birth and twins are very rare.
